
Roman Dużyński

SENIOR FULL-STACK .NET ENGINEER

romduz@gmail.com · +48 795 757 715 · linkedin.com/in/roman-dużyński · hokage.pl

Opole, Poland · Remote · CET · EU citizen

SKILLS

BACKEND

.NET 8 · C# · ASP.NET Core · Minimal APIs · REST API · Entity Framework · Dapper · MediatR · RabbitMQ · SignalR · Identity Server · Polly · Hangfire · Serilog / Seq · MQTT · Swagger / OpenAPI · GraphQL · HotChocolate

ARCHITECTURE

CQRS · DDD · Clean Architecture · Modular Monolith · Microservices · SOLID · TDD / BDD · xUnit

FRONTEND

Angular · RxJS · NgRx / NgXs · React · Blazor · TypeScript · Tailwind · PrimeNG

CLOUD & DEVOPS

Azure · Kubernetes / AKS · Docker · Azure DevOps · Azure Pipelines · Jenkins · IIS · App Center · Blob Storage · Key Vault

DATABASES

MS SQL · PostgreSQL · Redis · Elasticsearch · SQLite

AI

Claude · Claude Code · superpowers

TESTING & QUALITY

SpecFlow · Playwright · SonarQube

MOBILE

React Native · Xamarin Forms · Xamarin Native · MVVM Cross

LANGUAGES

PROFILE

I founded an engineering branch from zero, grew it to **5 people**, and architected a logistics platform for Darling Ingredients from event storming sessions through to production — that is what **10 years** of full-stack .NET looks like in practice. Senior developer across oil & gas, logistics, warehousing, and financial services; experienced technical liaison who translates client requirements directly into architecture decisions. After six years building and leading a team, I chose to return to hands-on engineering — that is where I do my best work and where I want to stay.

WORK EXPERIENCE

Senior Software Engineer

Sept 2024 – Present

Yameo · Gdańsk, Poland

- Contributing to **StockTrack** — an offshore energy supply chain platform handling vessel operations, real-time asset tracking, stock trades, and analytics; deployed on Azure-hosted Kubernetes (AKS) with Jenkins CI/CD.
- Serving as **primary technical liaison to energy sector clients** — translating business requirements directly into architecture decisions in a full-ownership model with no intermediary PM layer — working within two-week Scrum sprints with backlog refinement handled directly with the client.
- Delivered a Blazor-based internal tooling application, expanding team frontend capability beyond the primary Angular stack.
- Modernized the team's BDD workflow using **Claude** and **superpowers** to accelerate **SpecFlow** step generation.

Team Lead Software Developer

Nov 2018 – Sept 2024

Porta Capena Sp. z o.o. · Opole, Poland

- With no local engineering presence, founded Porta Capena's Opole branch — hired and onboarded **5 engineers**, defined technical standards and workflows, growing it into the company's primary delivery unit.
- Served as architect and initial product owner on **Nexus** (logistics platform for Ecoson / Darling Ingredients) — applied DDD across 3 modules, navigated a mid-project scope change by renegotiating priorities directly with the client, and delivered in **3 years** on schedule and within budget.
- Owned Azure DevOps end-to-end: CI/CD pipelines, boards, App Center deployments, and cloud infrastructure across multiple active projects simultaneously.
- Established team logging and monitoring standards using Serilog/Seq and Application Insights, giving the team production visibility across all live projects simultaneously.

Approach

Before writing any code, I run event storming sessions with domain experts to surface the actual domain model — not just the stated requirements.

I default to a modular monolith and add distribution only when team size or operational load makes it necessary.

Having worked directly with clients for years, I factor business constraints and delivery risk into every architectural decision, not as an afterthought.

I use Claude Code to tighten the loop between design and working code — it lets me prototype and validate faster without adding overhead.

I care about making the right call, shipping it cleanly, and leaving the codebase in better shape than I found it.

KEY PROJECTS

Nexus — Logistics Platform · Ecoson / Darling Ingredients

2020 – 2024

Modular monolith with **4 modules**: fleet management, route optimization, driver tracking & geofencing, and ERP integration (Odoo). Handles around **100 active vehicles and drivers daily** across several countries, with SSO across web and mobile using OAuth 2.0 / OpenID Connect (Identity Server 4), automated PDF/Excel reporting, and trip cost optimization.

Role: Solution architect and team lead (5 engineers). Defined scope and technical standards, acted as product owner in early phase, facilitated stakeholder communication — delivered on schedule within budget.

.NET Core 3.1 | Angular | RxJS | Xamarin Forms 5 | MS SQL | Identity Server 4 | SignalR | RabbitMQ | Elasticsearch | Redis | Docker | Azure CI/CD | PrimeNG | xUnit

PurpleApp — Employee Management & Operations Platform

2023 – 2024

Multipurpose enterprise platform: mobile task assignment, time & activity tracking, building floor plans, asset flow, integrated sales/purchase orders, and ERP integration. **Domain designed end-to-end via event storming** before a single line of code was written.

Role: Led domain design sessions, defined RESTful API structure, and shaped UI/UX for the frontend layer.

.NET 6 | ReactJS | React Native | EF Core 6 | MediatR | CQRS | JWT | PrimeReact | Hangfire | Azure Blob Storage | Dapper | Azure DevOps

Axon — Warehouse Management System

2018 – 2019

Comprehensive WMS with asset management, full traceability, granular user-role policies, and extensive automated test coverage across web, API, and mobile layers.

Role: Core developer (one of two) — delivered mobile app, REST API, and web frontend with **comprehensive xUnit coverage** from the ground up.

.NET Core 2.2 | Angular | Xamarin Native | MS SQL | REST API | xUnit | IIS | Topshelf

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation).
