Roman Dużyński

SENIOR FULL-STACK .NET DEVELOPER

romduz@gmail.com · +48 795 757 715 · linkedin.com/in/roman-dużyński · hokage.pl

Opole, Poland · Remote · CET · EU citizen

SKILLS

BACKEND

.NET 8 · C# · ASP.NET Core · Minimal APIs · REST API · Entity Framework · Dapper · MediatR · RabbitMQ · SignalR · Identity Server · Polly · Hangfire · Serilog / Seq · MQTT · Swagger / OpenAPI · GraphQL · HotChocolate

ARCHITECTURE

CQRS · DDD · Clean Architecture · Modular Monolith · Microservices · SOLID · TDD / BDD · xUnit

FRONTEND

Angular · RxJS · NgRx / NgXs · React · Blazor · TypeScript · Tailwind · PrimeNG

CLOUD & DEVOPS

Azure · Kubernetes / AKS · Docker · Azure DevOps · Azure Pipelines · Jenkins · IIS · App Center · Blob Storage · Key Vault

DATABASES

MS SQL · PostgreSQL · Redis · Elasticsearch · SQLite

TOOLING & AI

Claude Code · GitHub Copilot · SonarQube

MOBILE

React Native · Xamarin Forms · Xamarin Native · MVVM Cross

LANGUAGES

Polish
Native

English
B2 / C1 Advanced

EDUCATION

Engineer in Computer Science
Opole University of Technology
2012 – 2016

Erasmus Exchange
Instituto Politécnico de Bragança
Portugal · 2013 – 2014

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
Sept 2024 · ID: 68F6C600621CAC50

PROFILE

I built an engineering branch from zero, grew it to **5 people**, and took a logistics platform for Darling Ingredients from a whiteboard to production. That is what **10 years** of full-stack .NET looks like in practice. I have worked across logistics, warehousing, energy, and financial services, mostly as the person sitting directly between the client and the codebase. I treat AI as a force multiplier — Claude is embedded in my daily workflow, at every stage of delivery.

WORK EXPERIENCE

Senior Software Engineer
Sept 2024 – Present

Yameo · Gdańsk, Poland

- Contributing to **StockTrack**, an enterprise offshore logistics platform handling inventory tracking, stock trades, and real-time analytics; running on Azure Kubernetes (AKS) with Jenkins CI/CD.
- Acting as the direct technical contact for energy sector clients, turning business requirements into architecture decisions with no PM layer — working within two-week Scrum sprints with backlog refinement handled directly with the client.
- Delivered a Blazor internal tooling app, expanding team capability beyond the primary Angular stack.

Team Lead Software Developer
Nov 2018 – Sept 2024

Porta Capena Sp. z o.o. · Opole, Poland

- Built Porta Capena's Opole branch from nothing, hired and onboarded **5 engineers**, set technical standards and workflows, and turned it into the company's main delivery team.
- Served as architect and product owner on **Nexus** (logistics platform for Ecoson / Darling Ingredients), applied DDD across 5 bounded contexts, handled a mid-project scope shift by going back to the client directly, and shipped in **3 years** on time and on budget.
- Owned Azure DevOps end-to-end: CI/CD pipelines, boards, App Center deployments, and cloud infra across several live projects at once.
- Established team logging and monitoring standards using Serilog/Seq and Application Insights, giving the team production visibility across all live projects simultaneously.
- Defined team testing standards: unit coverage requirements with xUnit, integration test strategy across service boundaries, and mandatory code review before merge — practices that became the delivery quality baseline.
- Mentored **3 junior developers** to mid-level; established Agile delivery practices across all projects — sprint planning, backlog ownership, retrospectives — and introduced code review standards that became the team's quality baseline.
- Applied DDD, CQRS, and event-driven architecture patterns across projects. Facilitated event storming sessions to keep engineering and stakeholder communication aligned throughout delivery.

Software Developer
March 2016 – Nov 2018

Porta Capena Sp. z o.o. · Wrocław, Poland

- Worked across **multiple concurrent projects**: IoT energy management (**Enetic**), energy analytics (**Ecoscada**), procedure management for smart glasses (**Proceedix**), and logistics. Always the one handed the cross-technology problems nobody else wanted to touch.
- Led frontend migration from MVC Razor to Angular on two projects, introducing component-based architecture to the team for the first time.
- Built cross-platform mobile apps in Xamarin Native and Xamarin Forms for iOS and Android from a shared C# codebase. Became the go-to person for mobile on the team.
- Designed application architectures across REST API, MVC, WPF, WinForms, and Angular, and made the early technology calls that shaped the team's stack for years.

Junior .NET Developer
Aug 2015 – March 2016

CUBE.ITG · Wrocław, Poland

- Contributed to a commercial ASP.NET MVC 4.0 platform for **Santander Group** (UK finance market). Large codebase, strict deadlines, regulatory requirements. A good place to learn discipline.

Approach

Most software problems come from not understanding the business. **Get the domain right** and the rest follows. DDD and Clean Architecture gave me language for conversations I was already having.

Over 10 years taught me to stay **pragmatic**. A monolith before any distributed system, patterns only where they earn their complexity.

Since late 2025 **Claude Code** is part of my daily work. MVPs in days, not weeks. But I've seen enough AI mess to know you always need a human in the loop.

KEY PROJECTS

StockTrack: Offshore Energy Logistics Platform · Yameo

2024 – Present

Enterprise platform for offshore energy logistics: inventory tracking, stock trades, distribution control, and real-time analytics. Built on DDD aggregates with Clean Architecture, GraphQL API, and NGXS state management on the frontend. Runs on Kubernetes with Azure Pipelines CI/CD. Serves multiple energy sector clients with operations spanning offshore vessels and onshore depots across several countries.

Role: Senior Software Engineer. Direct technical contact for energy sector clients.

.NET 8 | Angular 19 | NGXS | GraphQL | HotChocolate | PostgreSQL | MongoDB | Hangfire | Docker | Kubernetes | Azure Pipelines | Azure Blob Storage | SignalR | Playwright

Nexus: Logistics Platform · Ecoson / Darling Ingredients

2020 – 2024

Modular monolith with **4 modules**: fleet management, route optimization, driver tracking & geofencing, and ERP integration (Odoo). Handles around **100 active vehicles and drivers daily** across several countries, with SSO across web and mobile using OAuth 2.0 / OpenID Connect (Identity Server 4), automated PDF/Excel reporting, and trip cost optimization.

Role: Solution architect and team lead (5 engineers). Defined scope and technical standards, acted as product owner in early phase, facilitated stakeholder communication, delivered on schedule within budget.

.NET Core 3.1 | Angular | RxJS | Xamarin Forms 5 | MS SQL | Identity Server 4 | SignalR | RabbitMQ | Elasticsearch | Redis | Docker | Azure CI/CD | PrimeNG | xUnit

PurpleApp: Employee Management & Operations Platform

2023 – 2024

Multipurpose enterprise platform: mobile task assignment, time & activity tracking, building floor plans, asset flow, integrated sales/purchase orders, and ERP integration. **Domain designed via event storming** before development started.

Role: Led domain design sessions, defined the RESTful API structure, and shaped the frontend UI/UX.

.NET 6 | ReactJS | React Native | EF Core 6 | MediatR | CQRS | JWT | PrimeReact | Hangfire | Azure Blob Storage | Dapper | Azure DevOps

Axon: Warehouse Management System

2018 – 2019

A WMS with asset management, full traceability, granular role policies, and solid automated test coverage across web, API, and mobile.

Role: Core developer (one of two), built the mobile app, REST API, and web frontend with **full xUnit coverage** from scratch.

.NET Core 2.2 | Angular | Xamarin Native | MS SQL | REST API | xUnit | IIS | Topshelf

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation).
