EDUCATION

Engineer in Computer Science

Opole University of Technology

2012 – 2016

Erasmus Exchange

Instituto Politécnico de Bragança

Portugal · 2013 – 2014

CERTIFICATIONS

Microsoft Certified: Azure

Fundamentals

Sept 2024 · ID: 68F6C600621CAC50

PROFILE

10 years of .NET and Angular across petroleum, logistics, warehousing and regulated finance. Founded an engineering branch from zero and grew it to **5 engineers**; architected **Nexus**, a modular logistics platform for **Darling Ingredients**, delivered on schedule and within budget. Currently building a petroleum stock and trade platform at Yameo.

WORK EXPERIENCE

Senior Software Engineer

Sept 2024 – Present

Yameo · Gdańsk, Poland

- Develop **StockTrack**, an enterprise platform for petroleum stock and trade management - building trade and settlement features across a modular **.NET 8** backend and **Angular** frontend on **Azure AKS**.
- Contributing to a **public-sector system for a government client**.
- Delivered a **Blazor** internal tooling application, extending team frontend capability beyond Angular.
- Modernized the team's BDD workflow with **Claude Code**, cutting SpecFlow step-definition effort.

Team Lead Software Developer

Nov 2018 – Sept 2024

Porta Capena Sp. z o.o. · Opole, Poland

- Founded Porta Capena's Opole branch from zero - hired and onboarded **5 engineers**, defined technical standards and workflows, growing it into the company's primary delivery unit.
- Solution architect and initial product owner on **Nexus** for **Darling Ingredients** - modular architecture built with DDD, delivered in **3 years** on schedule and within budget.
- Owned Azure DevOps end-to-end across concurrent projects: CI/CD pipelines, boards, releases and cloud infrastructure.
- Set the team's delivery quality baseline - xUnit and integration coverage, mandatory code review, Serilog/Seq observability.
- Mentored **3 developers** from junior to mid-level and ran event storming sessions with stakeholders.

Software Developer

March 2016 – Nov 2018

Porta Capena Sp. z o.o. · Wrocław, Poland

- Delivered concurrent projects in IoT energy (**Enetic**), energy analytics (**Ecoscada**), smart-glasses procedure management (**Proceedix**) and fleet logistics (**OnTrack** for **Greenyard**).
- Led the MVC Razor to **Angular** migration on two projects, introducing component-based architecture to the team.
- Shipped **3 cross-platform mobile apps** (iOS + Android) from a shared C# codebase.

Junior .NET Developer

Aug 2015 – March 2016

CUBE.ITG · Wrocław, Poland

- Contributed to a commercial ASP.NET MVC platform for **Santander Group** (UK regulated finance) - large legacy codebase under regulatory quality standards.

DOMAIN EXPERIENCE

Petroleum Stock & Trading StockTrack · Yameo	Logistics & Fleet Management Darling Ingredients · Greenyard	Warehousing / WMS Axon
Regulated Finance (UK) Santander Group	IoT & Energy Analytics Enetic · Ecoscada	Workforce & Operations PurpleApp · Proceedix

KEY PROJECTS

StockTrack - Petroleum Stock & Trade Management Platform · Yameo 2024 – Present Enterprise platform tracking petroleum stock across terminals, vessels and onshore/offshore deliveries - nominations, lien transfers, swaps, product conversions and settlement workflows. Modular architecture with GraphQL read-side / REST command-side and GitOps delivery. Role: Senior developer on the delivery team - hands-on implementation of trade and settlement features across the backend and Angular frontend. .NET 8 GraphQL (HotChocolate) Angular PostgreSQL MongoDB SignalR Identity Server Docker .NET Aspire Kubernetes (AKS) Terraform ArgoCD OpenTelemetry Azure Pipelines Jenkins
Nexus - Logistics Platform · Ecoson / Darling Ingredients 2020 – 2024 Modular monolith covering fleet management, route optimization, driver tracking & geofencing and ERP integration (Odoos). Handles ~100 active vehicles/drivers daily across several countries, with SSO (OAuth 2.0 / OIDC), automated PDF/Excel reporting and trip cost optimization. Role: Solution architect and team lead (5 engineers) - defined scope and technical standards, product owner in the early phase. Delivered on schedule within budget. .NET Core 3.1 Angular RxJS Xamarin Forms 5 MS SQL Identity Server 4 SignalR RabbitMQ Elasticsearch Redis Docker Azure CI/CD PrimeNG xUnit
OnTrack - Fleet Tracking & Logistics Platform · Greenyard 2017 – Present Fleet tracking and logistics platform: real-time vehicle and driver tracking, route planning and import, driver work-day handling and analytics reporting. Integrates electronic CMR, Google Maps and Skaut telematics devices; the Android driver app works offline and syncs on reconnect. Role: Co-author - built the entire system with one other engineer across backend, Angular admin portal and mobile app. Still maintain it in production after 8 years, including paid on-call night support. .NET Core Clean Architecture Angular PrimeNG EF Core MS SQL SignalR Hangfire JWT .NET MAUI SQLite Google Maps API eCMR xUnit Moq
PurpleApp - Employee Management & Operations Platform 2023 – 2024 Enterprise operations platform: mobile task assignment, time & activity tracking, building floor plans, asset flow, sales/purchase orders and ERP integration. Domain designed end-to-end via event storming before implementation started. Role: Led domain design sessions, defined the REST API structure and shaped frontend UI/UX. .NET 6 ReactJS React Native EF Core 6 MediatR CQRS JWT PrimeReact Hangfire Azure Blob Storage Dapper Azure DevOps
Axon - Warehouse Management System 2018 – 2019 Warehouse management system with asset management, full traceability and granular user-role policies across web, API and mobile layers. Role: Core developer (one of two) - built the mobile app, REST API and web frontend with xUnit coverage from the ground up. .NET Core 2.2 Angular Xamarin Native MS SQL REST API xUnit IIS Topshelf
