Roman Dużyński

SENIOR FULL-STACK .NET ENGINEER

romduz@gmail.com · +48 795 757 715 · linkedin.com/in/roman-dużyński · hokage.pl

Opole, Poland · Remote · CET · EU citizen

SKILLS

BACKEND

.NET 8 · C# · ASP.NET Core · REST API · Entity Framework · Dapper · MediatR · RabbitMQ · SignalR · Identity Server · Hangfire · Serilog / Seq · MQTT · GraphQL · HotChocolate

ARCHITECTURE

CQRS · DDD · Clean Architecture · Modular Monolith · Microservices · SOLID · TDD / BDD · xUnit

FRONTEND

Angular · RxJS · NgRx / NgXs · React · Blazor · TypeScript · Tailwind · PrimeNG

CLOUD & DEVOPS

Azure · Kubernetes / AKS · Docker · Azure DevOps · Azure Pipelines · IIS · App Center · Blob Storage · Key Vault

DATABASES

MS SQL · PostgreSQL · Redis · Elasticsearch · SQLite

AI

Claude Code · GitHub Copilot

MOBILE

React Native · Xamarin Forms · Xamarin Native · MVVM Cross

LANGUAGES

Polish
Native

English
B2 / C1 Advanced

EDUCATION

Engineer in Computer Science
Opole University of Technology
2012 – 2016

Erasmus Exchange
Instituto Politécnico de Bragança
Portugal · 2013 – 2014

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
Sept 2024 · ID: 68F6C600621CAC50

PROFILE

10 years of full-stack .NET across logistics, warehousing, energy, and finance — usually the person sitting directly between the client and the codebase. **Built an engineering branch from zero to 5 engineers** and took the Darling Ingredients logistics platform from whiteboard to production. **AI-assisted development** is part of my daily workflow.

WORK EXPERIENCE

Senior Software Engineer
Sept 2024 – Present

Yameo · Gdańsk, Poland

- Contributing to **StockTrack**, an enterprise offshore logistics platform (inventory, stock trades, real-time analytics) on Azure Kubernetes with Jenkins CI/CD. Direct technical contact for energy sector clients, turning requirements into architecture with no PM layer.
- Delivered a Blazor internal tooling app, extending team capability beyond the Angular stack.

Team Lead Software Developer
Nov 2018 – Sept 2024

Porta Capena Sp. z o.o. · Opole, Poland

- Built the Opole branch from nothing: hired and onboarded **5 engineers**, set technical standards, and turned it into the company's main delivery team. Mentored **3 juniors to mid-level**.
- Architect and product owner on **Nexus** (Ecoson / Darling Ingredients): DDD across 5 bounded contexts, absorbed a mid-project scope shift, shipped in 3 years on time and on budget.
- Owned Azure DevOps end-to-end across multiple live projects; set team standards for Serilog/Seq + App Insights logging, xUnit testing, mandatory code review, and Agile delivery (event storming, retros, backlog ownership).

Software Developer
March 2016 – Nov 2018

Porta Capena Sp. z o.o. · Wrocław, Poland

- Worked across concurrent projects: IoT energy (**Enetic**), energy analytics (**Ecoscada**), smart-glasses procedures (**Proceedix**), and logistics. The one handed the cross-technology problems.
- Led frontend migration from MVC Razor to Angular on two projects; built cross-platform mobile apps in Xamarin Native / Xamarin Forms from a shared C# codebase, becoming the team's go-to for mobile.

Junior .NET Developer
Aug 2015 – March 2016

CUBE.ITG · Wrocław, Poland

- Commercial ASP.NET MVC 4.0 platform for **Santander Group** (UK finance): large codebase, strict deadlines, regulatory rules.

Approach

Before writing any code, I run **event storming** sessions with domain experts to surface the actual domain model, not just the stated requirements.

I default to a **modular monolith** and add distribution only when team size or operational load makes it necessary.

Having worked directly with clients for years, I factor business constraints and delivery risk into every architectural decision, not as an afterthought.

I use GitHub Copilot to tighten the loop between design and working code, letting me prototype and validate faster without adding overhead.

I care about making the right call, shipping it cleanly, and leaving the codebase in better shape than I found it.

KEY PROJECTS

Nexus: Logistics Platform · Ecoson / Darling Ingredients

2020 – 2024

Modular monolith with **3 DDD modules**: fleet management, route optimization, and driver tracking & analytics. Handles around **100 active vehicles and drivers daily** across several countries, with SSO across web and mobile using OAuth 2.0 / OpenID Connect (Identity Server 4), automated PDF/Excel reporting, and trip cost optimization.

Role: Solution architect and team lead (5 engineers). Defined scope and technical standards, acted as product owner in early phase, facilitated stakeholder communication; delivered on schedule within budget.

.NET Core 3.1 · Angular · RxJS · Xamarin Forms 5 · MS SQL · Identity Server 4 · SignalR · RabbitMQ · Elasticsearch · Redis · Docker · Azure CI/CD · PrimeNG · xUnit

PurpleApp: Employee Management & Operations Platform

2023 – 2024

Multipurpose enterprise platform: mobile task assignment, time & activity tracking, building floor plans, asset flow, integrated sales/purchase orders, and ERP integration. **Domain designed end-to-end via event storming** before a single line of code was written.

Role: Led domain design sessions, defined RESTful API structure, and shaped UI/UX for the frontend layer.

.NET 6 · ReactJS · React Native · EF Core 6 · MediatR · CQRS · JWT · PrimeReact · Hangfire · Azure Blob Storage · Dapper · Azure DevOps

Axon: Warehouse Management System

2018 – 2019

Comprehensive WMS with asset management, full traceability, granular user-role policies, and extensive automated test coverage across web, API, and mobile layers.

Role: Core developer (one of two), delivered mobile app, REST API, and web frontend with **comprehensive xUnit coverage** from the ground up.

.NET Core 2.2 · Angular · Xamarin Native · MS SQL · REST API · xUnit · IIS · Topshelf

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation).
