Roman Dużyński

SENIOR FULL-STACK .NET ENGINEER

romduz@gmail.com · +48 795 757 715 · linkedin.com/in/roman-dużyński · hokage.pl

Opole, Poland · Remote · CET · EU citizen

SKILLS

BACKEND

.NET 8 · C# · ASP.NET Core · REST API · Entity Framework · Dapper · MediatR · RabbitMQ · SignalR · Identity Server · Hangfire · Serilog / Seq · MQTT · GraphQL · HotChocolate

ARCHITECTURE

CQRS · DDD · Clean Architecture · Modular Monolith · Microservices · SOLID · TDD / BDD · xUnit

FRONTEND

Angular · RxJS · NgRx / NgXs · React · Blazor · TypeScript · Tailwind · PrimeNG

CLOUD & DEVOPS

Azure · Kubernetes / AKS · Docker · Azure DevOps · Azure Pipelines · Jenkins · IIS · App Center · Blob Storage · Key Vault

DATABASES

MS SQL · PostgreSQL · Redis · Elasticsearch · SQLite

AI & TESTING

Claude Code · superpowers · SpecFlow · Playwright · SonarQube

MOBILE

React Native · Xamarin Forms · Xamarin Native

LANGUAGES

Polish	Native
English	B2 / C1

EDUCATION

Engineer in Computer Science
Opole University of Technology
2012 – 2016

Erasmus Exchange
Instituto Politécnico de Bragança
Portugal · 2013 – 2014

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
Sept 2024 · ID: 68F6C600621CAC50

PROFILE

10 years of full-stack .NET across oil & gas, logistics, warehousing and financial services. Founded an engineering branch from zero, grew it to **5 people**, and architected a logistics platform for Darling Ingredients from event storming through to production. Experienced technical liaison who translates client requirements directly into architecture decisions.

WORK EXPERIENCE

Senior Software Engineer
Sept 2024 – Present

Yameo · Gdańsk, Poland

- Contributing to **StockTrack** - offshore energy supply chain platform handling vessel operations, real-time asset tracking, stock trades and analytics; deployed on Azure AKS with Jenkins CI/CD.
- Serving as **primary technical liaison to energy sector clients** - translating business requirements directly into architecture decisions in a full-ownership model with no intermediary PM layer.
- Delivered a Blazor-based internal tooling application, expanding team frontend capability beyond the primary Angular stack.
- Modernized the team's BDD workflow using **Claude** and **superpowers** to accelerate **SpecFlow** step generation.

Team Lead Software Developer
Nov 2018 – Sept 2024

Porta Capena Sp. z o.o. · Opole, Poland

- Founded Porta Capena's Opole branch from zero - hired and onboarded **5 engineers**, defined technical standards and workflows, growing it into the company's primary delivery unit.
- Served as architect and initial product owner on **Nexus** (logistics platform for Ecoson / Darling Ingredients) - applied DDD across 3 modules, delivered in **3 years** on schedule and within budget.
- Owned Azure DevOps end-to-end: CI/CD pipelines, boards, App Center deployments, and cloud infrastructure across multiple active projects simultaneously.
- Defined team standards for testing (xUnit, integration coverage, mandatory code review) and observability (Serilog/Seq, Application Insights) - became the delivery quality baseline.
- Mentored **3 junior developers** to mid-level; applied DDD, CQRS and event-driven patterns; facilitated event storming sessions to align engineering with stakeholders.

Software Developer
March 2016 – Nov 2018

Porta Capena Sp. z o.o. · Wrocław, Poland

- Delivered across **multiple concurrent projects** spanning IoT energy (**Enetic**), energy analytics (**Ecoscada**), procedure management for smart glasses (**Proceedix**), and logistics - consistently assigned to the highest-complexity cross-technology work.
- Led frontend migration from MVC Razor to Angular on two projects, introducing component-based architecture to the team's stack for the first time.
- Shipped 3 cross-platform mobile apps in Xamarin Native and Xamarin Forms (iOS + Android from a shared C# codebase) - becoming the team's primary mobile delivery resource.

Junior .NET Developer
Aug 2015 – March 2016

CUBE.ITG · Wrocław, Poland

- Contributed to a commercial ASP.NET MVC 4.0 platform for **Santander Group** (UK regulated finance) - large legacy codebase under strict delivery and regulatory quality standards.

Approach

I'm **pragmatic** with a strong **problem-solving mindset** - I focus on the actual problem behind a requirement, weigh trade-offs openly, and pick the **simplest solution** that holds up under real load instead of chasing the most elegant one on paper.

When designing architecture or scoping a new application, I reach for **event storming** on a **Miro board** with domain experts to map the **real domain model** before committing to a structure.

Having worked directly with clients for years, I factor **business constraints** and **delivery risk** into every architectural decision, not as an afterthought.

I use **Claude Code** daily to tighten the loop between design and working code, letting me **prototype, refactor, and validate** faster without adding overhead.

KEY PROJECTS

StockTrack - Petroleum Stock & Trade Management Platform · Yameo

2024 – Present

Enterprise platform tracking **petroleum stock across terminals, vessels and onshore/offshore deliveries** - nominations, lien transfers, swaps, product conversions and settlement workflows. Modular **.NET 8** with **GraphQL read-side / REST command-side**, hybrid PostgreSQL + MongoDB, SignalR, deployed on **AKS via ArgoCD GitOps** with full OpenTelemetry observability.

Role: Senior developer and client-facing engineer - leading domain analysis with stakeholders and translating trade/finance requirements into delivery scope alongside hands-on implementation.

.NET 8 | GraphQL (HotChocolate) | Angular | PostgreSQL | MongoDB | SignalR | Identity Server | Docker | .NET Aspire | Kubernetes (AKS) | Terraform | ArgoCD | OpenTelemetry | Azure Pipelines | Jenkins

Nexus - Logistics Platform · Ecoson / Darling Ingredients

2020 – 2024

Modular monolith with **4 modules**: fleet management, route optimization, driver tracking & geofencing, ERP integration (Odoo). Handles **~100 active vehicles/drivers daily** across several countries with SSO (OAuth 2.0 / OIDC, Identity Server 4), automated PDF/Excel reporting and trip cost optimization.

Role: Solution architect and team lead (5 engineers). Defined scope and technical standards, acted as product owner in early phase - delivered on schedule within budget.

.NET Core 3.1 | Angular | RxJS | Xamarin Forms 5 | MS SQL | Identity Server 4 | SignalR | RabbitMQ | Elasticsearch | Redis | Docker | Azure CI/CD | PrimeNG | xUnit

PurpleApp - Employee Management & Operations Platform

2023 – 2024

Multipurpose enterprise platform: mobile task assignment, time & activity tracking, building floor plans, asset flow, integrated sales/purchase orders, and ERP integration. **Domain designed end-to-end via event storming** before a single line of code was written.

Role: Led domain design sessions, defined RESTful API structure, and shaped UI/UX for the frontend layer.

.NET 6 | ReactJS | React Native | EF Core 6 | MediatR | CQRS | JWT | PrimeReact | Hangfire | Azure Blob Storage | Dapper | Azure DevOps

Axon - Warehouse Management System

2018 – 2019

Comprehensive WMS with asset management, full traceability, granular user-role policies, and extensive automated test coverage across web, API, and mobile layers.

Role: Core developer (one of two) - delivered mobile app, REST API, and web frontend with **comprehensive xUnit coverage** from the ground up.

.NET Core 2.2 | Angular | Xamarin Native | MS SQL | REST API | xUnit | IIS | Topshelf

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (General Data Protection Regulation).
